QUALITY DRILLING AND MATERIALS TESTING EQUIPMENT

## TOOL JOINT COMPOUNDS

**ADS-LUBE** is designed for intermediate drilling conditions. This leading water well formula contains copper flake, graphite and CZ-EX, plus rust and oxidation inhibitors. The high dynamic friction factor of **ADS-LUBE** helps prevent excessive down-hole make-up in all medium drilling applications and was specifically formulated to protect against galling and high stress.

**ADS-LUBE** is the professional choice product for all intermediate level drilling applications. Service rating is 0F (-18C) to 450F (230C). **ADS-LUBE** is available in one-gallon and 2-1/2 gallon pails.

**KOPR-KOTE** Heavy Duty Drill Pipe Compound is a high performance, copper-based thread compound for heavy duty applications. This lead-free water well formula contains copper flake, graphite, CZ-EX (Jet Lube's patented extreme pressure additive) and rust and oxidation inhibitors. **KOPR-KOTE** protects against seizing, galling and down-hole make-up and provides positive protection under every known drilling condition. It is easy to apply yet stays on surfaces for maximum protection, even on wet surfaces.

**KOPR-KOTE** has no equal in providing thread protection in demanding environments. Service rating is 0°F (-18 °C) to 450 °F (230 °C). **KOPR-KOTE** is available in one gallon and two gallon plastic pails.
