

# CORE EXTRUDER

Part # 2401000  
Catalog # 26386

Made with stainless steel cable

Up to 6" bit capacity

Weight limit: 250 lbs.

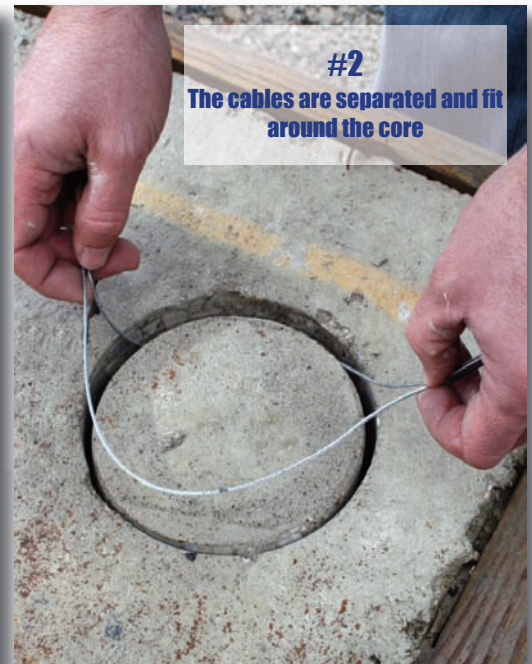

## We Make It Easy To Extract Your Core

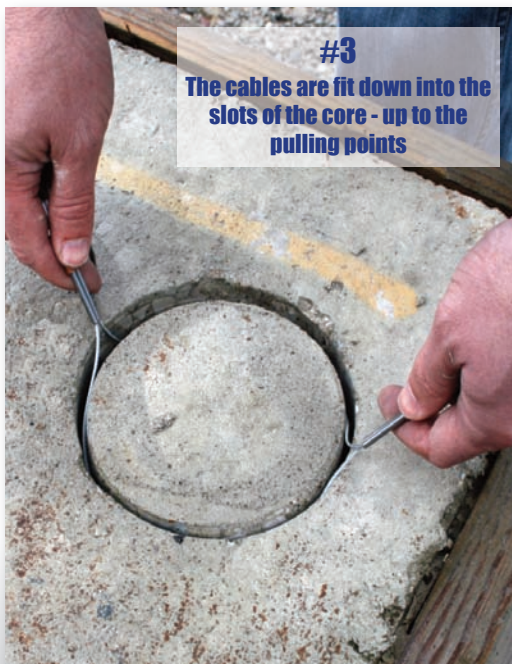

With Just a Few Quick Steps Using the Core Extruder

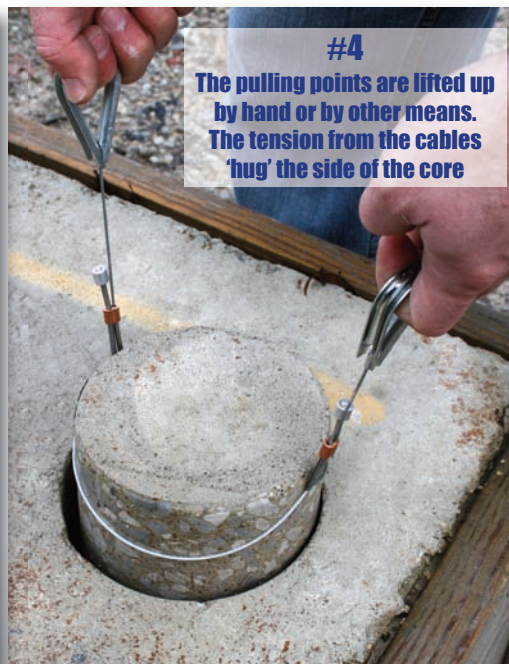

**#1**  
The extruder is stretched out to the width of the core

**#2**  
The cables are separated and fit around the core

**#3**  
The cables are fit down into the slots of the core - up to the pulling points

**#4**  
The pulling points are lifted up by hand or by other means. The tension from the cables 'hug' the side of the core

**#5**  
The core is extracted.
